Small Durango is playing the Victrola.

Phillip Harlan spends most of his time writing letters, and when he is not writing he is running back and forth looking for mail.

Paul Hollister gets a box by parcel post about every day, and Charles Kelso and Raymond Rodkey always open it so as to be the first to taste the goodies.

Sergeant Deal always has a cigar in his mouth and uses a box of matches to each cigar.

Mulroney drives miles in his sleep. He had a runaway the other night and had some time pulling the bed covers.

Harry Beard, from Roanoke, Va., is in his sleep. Last night he was walking around the barracks doing "right face" and "left face."

Gilbert is nearly always the last one in the mess hall, most times. He says he wants to finish a letter before he goes, or talk about his mother.

Nicholas Corto went to the movies at the Y. M. C. A. recently and fell asleep. He had to be awakened after the show, and then lost his way home.

Ernest Kleiber gets up in his sleep and yells "Hot cakes!"

If Cook Farman doesn't get a letter every day, he reads the old one over. Last week he wrote his mother a letter as he could go to the postoffice and get it.

Chuklin has joined the buglers. He almost drowns the rest of the bunch when he sets up the bugles.

Hollister gave a party last night. The guests present were Beard, Hahn, Troott and Rodkey. Lunch was served out of the box that Hollister had sent from Boston.

TO CONTROL THE
POTASH OUTPUT

President May Also Advocate Further Control of the Railroads.

Washington, D. C., Dec. 6.—Secretary of the Interior Lane today issued regulations under which permits may be obtained to prospect for potash on public lands. For some years all lands known to contain potash have been withdrawn from public acquisition, but the cutting off of potash from Germany makes it necessary to develop this country's supply of the valuable mineral.

Permits may be issued to citizens, associations and corporations of the United States for the exploration of not exceeding 500 acres each of land in compact form, the permits to be for a period of two years. If potash is discovered in commercial quantities and quality the permits will be entitled to a patent of one fourth of the area covered by his permit. The remainder to be subject to lease by the government.
